Subject: source code for wais

From: Robert Jones <jones@Think.COM>
Date: Tue, 5 May 92 09:41:34 EDT

I want to send out some public domain code that I've written. I need to put some 'TMC not responsible' verbage at the top of the code and I assume the wais code has such a thing. Where does the uncompressed wais source code live at TMC ?

Hi Rob!

it's in /proj/wais1/latest/README

Information Intelligence, Inc.
P.O. Box 31098
Phoenix, AZ 85046

Dear Mr. Huleatt,

Per our conversation this afternoon, you gave permission to Thinking Machines Corporation to distribute copies of the March 1992 issue of Online Libraries and Microcomputers. This issue featured an article titled, "WAIS: Wide Area Information Servers".

Thank you for your time, and approval, in this matter.

Sincerely,

Barbara C. Lincoln

Subject: confidential stats

Prodigy has 1.3M subscribers. Mind-boggling for such crap.
CIS has 900K subscribers.
GENie has 300K.

Of GENie's 300K subscribers, about 100,000 are active.
GENie has 3,250 ports, saturated 75 minutes/day.

America OnLine (AOL) has 160K users, typically on for 2 hours/week.
They have 1,525 ports, saturated 4 hours/day.

therefore budgetting 1% of subscribers active peak is typical.

Telebase is looking for 3% of subscribers on-line at once.
500 ports at launch.
